WORK EXPERIENCE

HealMeRight	Jan 2025 - present
Full Stack Developer Intern	
• Worked on optimizing a Progressive Web App (PWA) for seamless performance on both Android and iOS platforms. • Developed and enhanced the onboarding section of a client's website to improve user experience and engagement. • Integrated open-source tools like Formbricks for data collection and feedback, deploying them efficiently using Docker. • Utilized EJS, Node.js, SCSS, JavaScript, and Express.js to build scalable and maintainable web solutions.	
SkillGuru Foundation	Aug 2024 - Sept 2024
UI/UX Developer	
• Planned and developed 5 websites for clients, resulting in a significant 25% increase in online engagement, demonstrating expertise in web development and design. • Optimized clients' websites to improve search engine rankings by a notable 30%, showcasing ability to enhance online visibility and drive business growth.	

PROJECTS

SilentSpeak || Next.js, TypeScript, MongoDB, React Hooks, OpenAI API

- Developed an anonymous messaging application using Next.js, TypeScript, and MongoDB enabling users to send **secret messages** with optional acceptance settings.
- Implemented custom **OTP-based authentication** and user validation using Next Auth, ensuring secure and reliable user sign-ups.

OFFPAY || Offline UPI Payment Solution

- Developed an offline UPI payment solution leveraging **USSD, SMS, and NFC** technologies to enable transactions without internet connectivity.
- Designed **offline transaction** capabilities for feature phones, improving accessibility for users with low digital literacy.
- Implemented **secure encryption protocols** and **data synchronization mechanisms** to ensure privacy and seamless operation

ACHIEVEMENTS

- Contributed in more then **20 open source** projects.
- selected in **3 Hackathons**.
- Solved **400+ DSA questions** on platforms like leetcode.
