EDUCATION

Walchand Institute of Technology

Solapur, India

Bachelor of Technology in Computer Science And Engineering, CGPA: 8.88/10.0 (Final Year) 2022 – 2026

EXPERIENCE

SDE Intern

Sept 2025 – Present

Today Solve Private Limited

Remote

- Built and maintained **ingestion pipelines** for **Google Docs**, **Sheets**, and **YouTube captions**, improving **data consistency** and **autosync reliability** in Hana.
- Diagnosed and fixed major ingestion issues including **race conditions**, **malformed memory chunks**, and **deletion inconsistencies**.
- Developed real-time **map features** and **dealer dashboards** for the Juice powerbank ecosystem using **cabinet telemetry** and **live station data**.
- Designed a **Sheets resync prototype** using **diffing** and **chunking** to reduce redundant processing.
- Owned **PR reviews**, **testing**, and **releases** across ingestion, dashboards, and memory tools; updated **documentation** and rebuilt ingestion environments.

Full Stack Developer Intern

Jan 2025 – July 2025

HealToFit

Remote

- Optimized **Progressive Web App (PWA)** architecture for **cross-platform performance** on Android and iOS using **React.js**, **TypeScript**, and **Frontend Performance Optimization**.
- Enhanced client **onboarding systems** and integrated **Formbricks** for data collection, deploying solutions with **Docker** and **CI/CD pipelines**, improving **user engagement** by 40%.
- Built maintainable web applications using **Node.js**, **Express.js**, **EJS** templating, and **SCSS**.

PROJECTS

OFFPAY - Offline UPI Payment Solution | *Node.js, MongoDB, REST APIs, NFC*

2024

- Engineered **offline UPI payment system** using **USSD**, **SMS**, and **NFC** technologies for seamless transactions **without internet**.
- Designed **accessible payment solutions** for **feature phones** enhancing **financial inclusion** using backend development and data synchronization.
- Implemented **encryption protocols** and integrated with **financial systems** using secure **APIs** and **data reconciliation** techniques.

ZomatoReels - Food Discovery Platform | *MERN Stack, MongoDB, Express.js, React.js, Node.js*

2025

- Built full-stack **MERN application** with **reels-style video feed** for food discovery, implementing **production-level folder structure** and **RESTful APIs**.
- Integrated **ImageKit** cloud storage, **Multer** file upload, and **UUID** for scalable **video management** with **metadata preloading** optimization.
- Implemented **JWT authentication**, **bcrypt** password hashing, **CORS**, and **cookie-parser** for secure user sessions and **role-based access control**.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, SCSS, Frontend Performance Optimization

Backend & Database: Java, Node.js, Express.js, REST APIs, MongoDB, MySQL, PostgreSQL, Spring Boot

Cloud & DevOps: AWS, Docker, Linux, Git, Version Control

Practices & Tools: Data Structures, Algorithms, Software Design Principles, Unit Testing, Code Reviews, Debugging, Agile, Scrum

ACHIEVEMENTS

- **Open Source:** 20+ contributions
- **Competitive Programming:** 500+ problems solved (LeetCode, GFG, HackerRank)
- **Hackathons:** Selected in 3 Hackathons
